

## ROCK & ROLL

The all-terrain frontman that's all rock and no glam. There's nothing pretentious or extraneous about our take on what a gravel bike should be: simple, purposeful and dare we say under engineered. With clearance for 700 x 45c tires, a threaded bottom bracket and easily-serviced external cable routing, the Gravel Disc eats dirt yet keeps things quick and fun with our race-bred geometry.

**Fast bikes. Made in the USA.**
