

## CLASSICAL

The founding member with all the right moves. The Road Rim frame straddles the line between classic and modern, and is the bike we'll always want to ride. Threaded bottom bracket, external cable routing and center brake mounts stand the test of time, yet the Road Rim wants to lead. A compact design and clean, straight lines suggest what's at the heart of the Road Rim, an unapologetic current take on what a fast road bike should be.
