About

Fast bikes since 2016

VYNL Bikes debuted with the unconventional idea of offering simple and uncomplicated U.S.-made aluminium race bikes. Our first bike was a rim brake road model that proudly stuck it to technology hype. We will always offer this bike. Long live the rim brake. We've since expanded our models, each founded in our straightforward approach to making frames. Our frames are constructed of hand selected 7005 aluminium tubing and are hand welded with careful, skilled manufacturing. Every VYNL has a heavy hit of race-inspired geometry and will leave you gasping "this thing is fast!"

Made in the USA

Boulder, Colorado is our home. We're a family of racers, passionate riders and true craftsmen with deep experience in building, painting and enjoying bikes. All of our frames are handmade and hand painted in the USA and we use local craftspeople whenever possible. We back our quality and expect our bikes to be ridden hard.

Just your speed

You personalize your VYNL to be all your own and you'll be hard pressed to find another one like it. We've worked hard to deliver a bike that strikes the balance between lively and durable. Now that it's in your hands, there's no holding back on where you can take your VYNL.

Race-bred

Geometry born from racing

The VYNL Bikes approach to fast bikes is a combination of tried-and-true aluminum construction and clever race-bred geometry. The result is a durable and lively ride that's best described as fun.

Race-bred Geometry

VYNL geometries are different from our aluminum competition. The reach is a little longer and the stack is a little shorter, allowing the riding position to feel more aggressive. The combination of a classic racing 73° head tube angle and a reduced fork offset deliver a sweet spot between responsiveness and stability. Our chainstays are shorter and bottom brackets lower, creating a bike that drives corners.

Fast is Fun

Our race-bred approach to geometry creates a competitive ride characteristic that's precise, responsive, snappy and stiff. The VYNL ride characteristic can be customized with your preference of wheels, tires, stem and seat post. Whatever your flavor, every VYNL has a penchant to transfer power, rail corners and rip descents. In other words, VYNL bikes are fast and fast is fun.

Welcome

You are part of the team now.

You've made the cut. VYNL Bikes is a small operation. Every frame that goes out the door is a product of hard work and careful craftsmanship. As such, we love to see how you build your VYNL and where it takes you. Stay in touch, share your build, love the ride.

Returns & Warranty

You are part of the team now.

If you're not happy, we're not happy.

We hope you are completely satisfied with your new VYNL frame, but should you not be, we'll do our best to make it better. New, unaltered and unharmed stock color frames are available for return within 60 days of purchase. This includes signal white, jet black, raw and light pink.

For more information or to start a return, please see our Return Policy at

vynlbikes.com/the-small-print.

We stand behind our product and will repair or replace defective frames under our limited warranty.

The limited warranty covers the original purchaser with an original dated purchase receipt.

For more information, please see our Limited Warranty Policy at:

vynlbikes.com/the-small-print.

**We get it, you
are stoked to
go rip your new
frame, but safety
comes first.**

Safety

Because lawyers say so.

Ensure that your frame has been built properly and carefully.

Check your brakes, bolts and axles before every ride and inspect your frame regularly.

Always wear a helmet and follow traffic rules.

Keep yourself visible while riding, especially at night.
